EXPERIENCE

Magnos — Co-Founder *New York, NY — 2026 - Present*

- AI Operating System that unifies operational and financial data with company context into a real-time operating model, and deploys AI agents to automate reporting, planning, and analysis so leadership teams can make faster, smarter decisions
- Raised **\$3.2M** from notable Silicon Valley-based investors

kAi Sabanci — Founder, President *Istanbul, Turkey — 2023 - 2025*

- Founded and scaled Sabanci University's AI club into a **600+** member organization, secured founding-member status in the **NVIDIA Student Network**, and led technical and partnership initiatives

Carnegie Mellon University — Researcher *Pittsburgh, PA — 2023 - 2025*

- Researched question generation and multi-agent AI systems, developing structured LLM workflows and evaluation methods that improved generation quality by over **60%** versus baselines

KTH Royal Institute of Technology — Researcher *Stockholm, Sweden — 2024 - 2024*

- Developed conversational AI systems for turn-taking, combining inference optimization, audio augmentation, and deployment on Furhat humanoid robots to improve real-world interaction quality

Technische Universität Darmstadt — Researcher *Darmstadt, Germany — 2024 - 2024*

- Developed a culturally sensitive agentic AI system for psychological assessment of Ukrainian refugees, integrating autonomous reasoning and deployment-grade optimization for clinical use at Charite Berlin

Cohere — Researcher *Remote — 2024 - 2024*

- Co-authored INCLUDE, an ICLR 2025 **Spotlight** multilingual language understanding benchmark, and contributed to Project Aya by building LLM- and VLM-powered data pipelines to extract and curate evaluation data across diverse languages

Yapı Kredi Teknoloji — NLP Engineer *Istanbul, Turkey — 2023 - 2024*

- Improved document understanding systems with OCR-free transformer models and reduced annotation effort through transfer learning-based language model fine-tuning

EPFL — Researcher *Lausanne, Switzerland — 2023 - 2023*

- Built privacy-preserving federated ML infra, combining CUDA-accelerated optimization, benchmarking systems, and robust distributed training tools to significantly improve performance and efficiency

Boston University — Researcher *Boston, MA — 2022 - 2022*

- Researched secure server architecture for resource-intensive systems and developed a **C++** design tool to explore large-scale configuration tradeoffs

Pharus Tech — Product Advisor *Stockholm, Sweden — 2020 - 2020*

- Advised on product direction and data workflows for labor market intelligence tools, supporting the development of skill-survey systems

AWARDS

Sakip Sabanci Award for Outstanding Success (2x), Sabanci University **Sep 2022**

Innovation in Crisis Award, The Royal Swedish Academy of Engineering Sciences **May 2020**

Junior Academy Membership, The New York Academy of Sciences **Sep 2019**

EDUCATION

Sabanci University **B.S. in Computer Science**
